

CareConnect

Virtual Consultation for Inpatients

Overview

CareConnect is a secure teleconsultation platform designed specifically for inpatients. It transforms how patients interact with their care teams by enabling virtual consultations, secure messaging, and real-time collaboration. The system integrates seamlessly with the Hospital Information System (HIS), reduces staff workload, and elevates patient satisfaction through faster, more transparent communication.

Key Capabilities

Pre-Consultation Assistance

Reminders & Notifications

Automated alerts for upcoming consultations.

Digital Consent

Patients can sign and manage consent forms electronically

Access Options

Requests and communication can be initiated or received either by the patient – through the hospital bedside terminal or their own device (BYOD) – or by nurses via their assigned devices.

Care Team Transparency

Patients see which doctors, nurses, and pharmacists are responsible for their case.

Key Capabilities

Assistance During Consultation

Virtual Consultations

Secure video or chat sessions between patient and attending physician.

Multi-Disciplinary Collaboration

Doctors can invite consultants, specialists, or pharmacists to join the session.

Family & Guardian Participation

Patients can allow a listener to join virtually.

File Sharing

Securely exchange lab reports, prescriptions, or images during the session.

Key Capabilities

Post-Consultation Assistance

Follow-Up Scheduling

Doctors can book follow-up visits directly within the platform.

Discharge Counseling

Pharmacists can provide remote medication guidance during discharge, saving nursing time.

Feedback Collection

Patients can submit feedback instantly, enabling hospitals to measure service quality.

Continuity of Care

Documentation and notes remain accessible in the patient record via HIS integration.

Use Cases

Use Case 1 – Doctor Collaboration

Attending doctor adds a consultant from another department to join the patient's virtual consultation instantly.

Use Cases

Use Case 2 – Pharmacist Counseling

Pharmacist provides discharge medication guidance directly through CareConnect, ensuring clear instructions and saving nursing time.

Benefits for Hospitals

01

Continuity of Care in Isolation

Ensures doctors can stay connected with patients during isolation or infection-control cases without risking cross-contamination.

**Optimized
Staff Time****02**

Reduces unnecessary routine visits, allowing medical teams to focus on critical cases.

03

Compliance & Safety

Full documentation with secure e-consent strengthens governance and meets quality standards.

**Highly
customizable****04**

Can be customized to serve different departments in the hospital

Benefits for Patients

Reassurance & Comfort

Patients feel their care team is always within reach, even outside traditional ward rounds.

Transparency

Clear visibility of who is responsible for their case and when they will be seen.

Faster Access to Care

Ability to request consultations directly from their devices reduces waiting times.

Safe & Private Experience

Secure, private communication – especially important for infectious cases or sensitive discussions.

Smooth Discharge

Clear guidance from pharmacists at discharge ensures patients leave with confidence and understanding.
