

CareSuite

Housekeeping & Facility Request Management for Hospitals

Overview

CareSuite is a hospital-grade solution designed to streamline house-keeping and facility service management. It enables patients and their bystanders to raise service requests digitally, while nurses and facility staff monitor and fulfill these requests through an integrated workflow.

Why Hospitals Need CareSuite

Pain Points

Nurses are overloaded with non-clinical requests.

Housekeeping and facility teams often operate with little visibility or tracking.

Manual/phone-based request handling causes delays and errors.

No performance measurement for staff or room turnover time.

CareSuite Advantage

Patients raise requests directly from their bedside.

Requests are instantly routed to the related department.

Nurses and supervisors gain visibility over progress.

Management receives detailed KPIs and reports.

Core Features

Requests Management

Patients raise requests directly via CareSuite on Bedside Terminal.

Status updates visible in real time (New → Opened → In Progress → Waiting → Closed).

Configurable categories and work-flows for each department.

SLA monitoring and escalation for overdue requests.

Core Features

Facility Operations

Room status tracking (Occupied, Cleaning in Progress, Ready).

Staff assignment, scheduling, and performance tracking.

Complete audit trail of requests and actions.

Patient feedback collection for service quality.

Core Features

Touchpoints

CareSuite on Bedside Terminal

→ Patient-facing request entry.

CareStation Console → For nurses to monitor and raise requests.

CareSuite Web → Used when no Bedside or Nurse Station Platform is available.

System Use Cases

Patient

- ▶ Create a request
- ▶ Track request status until completion.
- ▶ Rate the quality of service.

Housekeeping / Facility Staff

- ▶ Receive assigned tasks in their CareSuite portal or mobile app.
- ▶ Accept, start, and complete tasks with proof of work.
- ▶ Create requests/complaints (admin-enabled)

Nurse

- ▶ Monitor patient request statuses in real time.
- ▶ Raise operational requests (e.g., discharge cleaning).
- ▶ Ensure visibility of tasks within their ward.

Admin / Supervisors

- ▶ Configure workflows, roles, and privileges.
- ▶ Monitor teams and request queues.
- ▶ Track KPIs.
- ▶ Generate reports.
- ▶ Manage requests policies.

System Flow

Benefits for Hospitals

01

Patients

Faster service, ability to track requests, better experience.

02

Nurses

Reduced non-clinical workload, more focus on patient care.

03

Housekeeping / Facility Staff

Clear assignments, KPIs, recognition of performance.

04

Admins

Real-time visibility, control, and reporting.

05

Management

Operational efficiency, reduced costs, improved patient satisfaction scores.

Technical & Security

Performance

API response
time <500ms.

Scalability

Support concurrent
requests across multiple
units.

Availability

99.9% uptime
with failover.

Security

TLS 1.2+, JWT
authentication.

Future Enhancements

AI request prioritization,
ERP integration,
voice-enabled requests.

Reports & KPIs

CareSuite

Faster . Smarter . Reliable
